

Blister Sleever

Brite stock manufacturing allows your production line to run at optimum speed, temporarily storing the blisters unlabeled in bulk.

As one of only two companies in the world, PharmaMed has created a blister sleever, allowing you to sleeve up to 200 Brite Stocking blisters per minute. Our compact, mobile blister sleever also includes toolless quick change to handle multiple blister sizes.

Quick Facts:

SLEEVES

0-200 blisters/min

BLISTER LENGTH/WIDTH

70-200mm / 35-80mm

TOOLLESS

Quick change parts

FLEXIBLE

Mobile design

End-line simplified

Built for better end-line production:

- ✓ Simple and technician-friendly HMI
- ✓ Dual sleeves allow for continuous operation
- ✓ Optional addition of top and bottom protective card

Built-in flexibility

Sleeve multiple blister sizes or convert to run a new product or SKU.

- ✓ Configurable recipes
- ✓ Available in two sizes
- ✓ Toolless quick change
- ✓ Also available as desleeving unit
- ✓ Re-tooling availability
